## MY COLLECTIONS

I've created my collections based on what's most popular with my clients. Each collection includes a consultation beforehand to discuss the goals and details of your photoshoot, including locations and outfit suggestions. Whether exploring mountain trails or lounging in your living room, together, we will create a playful session that captures your unique personality and preserve life's unforgettable moments.

From nesting in your newborn's nursery, to losing those two front teeth, to getting ready to head off to college, to simply loving the life you have created with your person in your new home- the images we make together will tell the story that's true to you! Also, no need to feel camera shy, I will make you feel so comfortable that you might forget the camera is even there. Just relax, laugh out loud, and let's create photographs that you will look at and absolutely love for a lifetime.

## GET THE GOODS

You have made the investment in fine art photography, and I am so glad you did! Now that you have all of these great moments captured, what are you going to do with them? I think of the photograph as an heirloom. It can tell your story and keep a paper trail of those fleeting moments big and small. I mean for me, there is nothing better than flipping through the stacks of photo albums at my grandmother's house, and witnessing my mother's hair choices over the years. In order to preserve your memories, I strongly believe that your photographs should be printed and displayed, rather than stored on computers and hard drives. Technology fails and becomes obsolete, whereas prints and albums can be held, and past down for generations to come. Plus, your house will feel more like a home with little reminders of your journey around.
